## P.E.A.C.E. HUBS DOCUMENT

---

## Client/Donor Needs Assessment

We map out Donor expectations through simplistic language and staging the building blocks relating to the outcomes they would like to achieve.

## Monitoring & Evaluation

Specialised data gathering and undertaking detailed analytics to produce strategic information that is essential for programmatic, policy and business decision making

## Assessment Report

Determine suitability of the intervention in the community or region identified, the type of donor/funder investment expectations, as well as recommended solutions that may be required before, during and after the intervention in order to ensure maximum return on investment for the Donor/Funder

## White boarding Session with Donor/Funder

Periodic design thinking with Donor/funder, performing quick inexpensive test runs instead of formulaic diversification. Developing a model that scales.

## Monitoring & Evaluation

- Providing data analytics aligned to the objectives of the research
- Presentation of differing levels of data management and visualisation package can be subscribed to
- Providing technical support in performance monitoring, evaluation, learning and improvement of products / programmes
